

Hello, I just wanted to comment on the new chance proposal to the indiana telephone privacy law. I think that it is great. I used to receive at least two unwanted calls a night. Now I am receiving about 1 a week. It is working wonderfully. I think that you should leave a good thing alone. Put the rest of the states on this plan.

I have better things to do with my time than to be solicited for services and products I don't want or need. this law also stops most of the illegal calls from scammers who want to take your money. I haven't received one of those for a long time. Leave Indiana's law alone. it is fine and working.

Thanks.

Tracy Myers.
